TROPICAL CYCLONE BULLETIN NO. 6

Tropical Depression "GARDO"

Issued at 11:00 PM, 31 August 2022

Valid for broadcast until the next bulletin at 5:00 AM tomorrow

HAZARDS AFFECTING LAND AREAS
"GARDO" is unlikely to directly affect the weather condition in the country within the forecast period.
HAZARDS AFFECTING COASTAL WATERS
The tropical depression is unlikely to directly affect the sea conditions over the coastal waters of the country.
TRACK AND INTENSITY OUTLOOK
<ul style="list-style-type: none">Tropical Depression "GARDO" is forecast to move generally north northwestward throughout the forecast period as it interacts with Super Typhoon "HENRY"."GARDO" will degenerate into a remnant low within 12 hours as "HENRY" begins to assimilate its circulation.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 5:00 AM tomorrow.
